FEATURE SUPERIOR, PRICE COMPETITIVE

CASECO's Model MML84 is designed as a *preventive maintenance unit*.

The 84" cab to axle body requires a minimum 19,000 GVWR (smaller units available). This truck has a shorter turning radius, better fuel economy, lower maintenance cost and better response time than the typical full blown field lube truck.

Standard features include:

- Exterior work lights
- Interior work lights
- Underbody boxes for storage
- Vertical side boxes for drawer units or additional storage
- Internal hinges with flush mount doors
- Rear access to hose reels and evac pump
- Used filter storage box/drip pan assembly

The truck pictured has:

- 200 gal fuel storage
- 200 gal evac tank
- Four 100 gal product storage tanks
- 75 gal antifreeze tank
- 120lb. grease set up
